

GENERAL:

Iron Anodes are used to protect internal corrosion in the evaporators, tube plates and tube ends, water treatment and desalination tanks with copper cooling/heating coils. Iron Anodes are installed bare in the direct contact to the tank.

VTS is manufacturing and supplying various size & shape of Iron Zinc Anodes as per client requirement.

SPECIFICATIONS:

CHEMICAL COMPOSITIONS:

	C%	Si%	Mn%	P%	S%	Ni%	Fe%
Pure Iron Anode	0.03 max	0.05 max	0.20 max	0.01 max	0.02 max	--	Balance
Iron Nickle Anode	0.05 max	0.05 max	0.014 max	0.03 max	0.02 max	0-9%	Balance
